Every home has its own report.

The information is compiled from public external data sources. Despite careful processing, data may be incomplete, outdated or incorrect. The information is indicative and does not replace a building survey, legal research, cadastral survey or municipal assessment.

Fictitious example: the address and data are illustrative and do not belong to an existing home.

SUMMARY

According to the BAG, Voorbeeldstraat 123 is a residential unit of 118 m², in a building originally constructed in 1934. The cadastral plot is 142 m². Energy label C is registered.

Key points about this home

NOTE REGISTER Built in 1934 Older construction period. Foundation, pipework and insulation deserve extra attention in a building survey. When demolishing or renovating a building from before the asbestos ban (1993), an asbestos survey may be mandatory.	NOTE REGISTER Secondary zoning designation (dubbelbestemming): Waarde - Archeologie 4 Additional rules may apply to renovations or excavation work.
NOTE AREA DATA Within a risk zone The address lies within an area of concern or safety zone around a company, pipeline or transport route for hazardous substances.	NOTE AREA DATA Vulnerable soil and many older buildings The soil here has limited bearing capacity (laagveengebied). 71% of the 34 buildings in postcode 0123AB were built before 1970, when foundations were often on wooden piles or without piles (shallow foundations). This home dates from 1934, so a foundation survey is particularly worthwhile here.
REGISTER For sale for €475,000 (asking price) Listed on Funda since 12 September 2026. The asking price is not a sale price; under Sales in the area you will also find previous sale prices of this home.	REGISTER Energy label C Registered on 14 June 2021, valid until 14 June 2031.
REGISTER 2 announcements for this address Official publications, for example about permits, linked to this address. See them in the report.	

Factual points from public sources, not an assessment of the condition of the home. "Note" means: extra attention is worthwhile here.

74 announcements were published within 250 m (all topics). This overview is based on publicly available digital announcements and is not a complete building or permit history.

07 Heritage and protection

REGISTER · Source: Rijksdienst voor het Cultureel Erfgoed

National monument (rijksmonument)	No
Municipal monument	No public municipal source for Voorbeeldstad
Protected townscape or village view	No

08 Living environment and climate

AREA DATA · Source: Geluidbelastingkaarten Richtlijn omgevingslawaaai 2021 · RIVM, Grootchalige Concentratiekaarten Nederland · Klimateffectatlas, 2026

Living-environment and climate data are area indicators from models and maps. They are not a structural or legal assessment of the individual home.

NOISE (STRATEGIC NOISE MAPS 2021, LDEN)

Road traffic	55–59 dB		Voorbeeldstad agglomeration
Rail traffic	No contour ≥ 55 dB		Voorbeeldstad agglomeration
Industry	No contour ≥ 55 dB		Voorbeeldstad agglomeration
National highways (rijkswegen)	No contour ≥ 55 dB		National (national highways)
Main railways	No contour ≥ 55 dB		National (main railways)

AIR QUALITY (ANNUAL AVERAGE 2025, 1×1 KM GRID)

Nitrogen dioxide (NO ₂)	17.2 µg/m ³		WHO 10 · EU 40
Particulate matter (PM2.5)	8.9 µg/m ³		WHO 5 · EU 25
Particulate matter (PM10)	15.8 µg/m ³		WHO 15 · EU 40

CLIMATE AND WATER (AREA INDICATORS)

Flood probability (> 20 cm of water)	Very low probability: 1/3,000 to 1/30,000 per year	raster map, national
Maximum water depth in a flood	0.5 - 1.0 metres	raster map, national
Felt temperature on a hot day	Strong heat stress: 38°C – 41°C	neighbourhood average
Ground movement (measured)	Limited (1.5 to 5 mm/year subsidence)	area map
Risk of foundation damage from pile rot	Low	neighbourhood level

These are data about the area, calculated with national maps. They do not mean that this home itself will flood, subside or suffer heat stress. A flood probability of 1/300 per year means on average once every 300 years; over 30 years that is roughly 1 in 10. The felt temperature is how hot it feels outside on a hot summer's day, not the temperature indoors.

EXTERNAL SAFETY

Area of concern at the address	Fire area of concern (hazardous substances route: Route Voorbeeldweg (N999))
Pipeline (aardgas): Gasunie Transport Services B.V.	240 m
Hazardous substances route by road: Route Voorbeeldweg (N999)	310 m

An area of concern (aandachtsgebied) is the area where an accident involving hazardous substances could have consequences. It says nothing about the probability of an accident. See the map in the Atlas Leefomgeving for the exact location.

09 Subsurface and foundation

AREA DATA · Source: BRO Bodemkaart, PDOK · BRO, Basisregistratie Ondergrond · Funderingskaart KCAF, RVO

Soil map 1:50,000	Kalkarme poldervaaggronden; zware zavel en lichte klei (Rn67C)
BRO investigations on this plot	None
Cone penetration tests within 500 m	14 · nearest 46 metres
Geotechnical boreholes within 500 m	3 · nearest 187 metres
Groundwater monitoring wells within 500 m	5 · nearest 92 metres

FOUNDATION MAP (KCAF)

Vulnerable soil area · 60-80 % of buildings from before 1970

The soil here has limited bearing capacity (laagveengebied). 71% of the 34 buildings in postcode 0123AB were built before 1970, when foundations were often on wooden piles or without piles (shallow foundations).

Indicative map per postcode: combines soil type and the share of buildings from before 1970. Says nothing about the type or condition of this home's foundation.

FOUNDATION CONTEXT

There is no public source with reliable foundation information per home. Below are only objective data that may be relevant to questions about the foundation.

Soil map: Kalkarme poldervaaggronden; zware zavel en lichte klei

Soil type according to the Soil Map 1:50,000 at this location. This is an area indication, not a soil investigation on the plot.

Built in 1934 (before 1970)

Depending on the region, buildings from before around 1970 were often founded on wooden piles or on shallow foundations (without piles). That says nothing about the condition of this particular foundation, but it is a reason to request foundation information.

14 cone penetration test(s) within 500 m

The nearest is 46 m away. CPTs describe the soil structure at that spot; they say nothing about the foundation of this home.

5 groundwater monitoring well(s) within 500 m

Nearest at 92 m. These wells measure the groundwater level, which is relevant for wooden pile foundations.

1 announcement(s) about foundations within 250 m

Nearest at 164 m. These concern other addresses in the area.

10 Amenities and accessibility

DISCLAIMER

The information is compiled from public external data sources. Despite careful processing, data may be incomplete, outdated or incorrect. The information is indicative and does not replace a building survey, legal research, cadastral survey or municipal assessment.

An individual WOZ value (municipal property valuation) is not included: there is no open data source for it. The permit overview is based on publicly available digital announcements and is not a complete building or permit history. We do not show names of owners, residents, buyers or sellers, nor mortgages; purchase prices only as they are public at the Land Registry.
